

## § 1254.106

## 36 CFR Ch. XII (7-1-10 Edition)

different payment schedule at our discretion.

### § 1254.106 What are NARA's equipment standards?

(a) Because we have limited space in many NARA facilities, microfilm/fiche equipment should be operable from a table top unless we have given written permission to use free standing/floor model cameras. You may only use planetary type camera equipment. You may not use automatic rotary cameras and other equipment with automatic feed devices. We may approve your use of book cradles or other specialized equipment designed for use with bound volumes, oversized documents, or other formats, as well as other camera types not specified here, on a case-by-case basis.

(b) The power consumption of the equipment normally must not exceed 1.2 kilowatts. Power normally available is 115 volts, 60 hz. You must make requests for electricity exceeding that normally available at least 90 days in advance.

(c) You may not use equipment having clamps or other devices to exert pressure upon or to attach the document to any surface in a way that might damage the document.

(d) The equipment must not use a heat generating light source in close enough proximity to the documents to result in their physical distortion or degradation. All sources of ultraviolet light must be filtered.

### § 1254.108 What are NARA's requirements for the microfilming process?

(a) Your equipment must conform to the equipment standards in §1254.106.

(b) You must handle documents according to the training and instructions provided by our staff so that documents are not damaged during copying and so that their original order is maintained. Only persons who have attended NARA training will be permitted to handle the documents or supervise microfilming operations. We charge you fees for training services and these fees will be based on direct salary costs (including benefits) and any related supply costs. We specify these fees in the written agreement we

require for project approval in §1254.102(h).

(c) You may microfilm documents from only one file unit at a time. After you complete microfilming, you must return documents you removed from files for microfilming to their original position in the file container, refasten any fasteners you removed to facilitate copying, and remove any tabs you placed on the documents to identify items to copy. We will provide fasteners for replacement as necessary.

(d) You may not leave documents unattended on the copying equipment or elsewhere.

(e) Under normal microfilming conditions, actual copying time per sheet must not exceed 30 seconds.

(f) You must turn off any lights used with the camera when the camera is not in actual operation.

(g) You may operate microfilm equipment only in the presence of the research room attendant or a designated NARA employee. If NARA places microfilm projects in a common research area with other researchers, the project will not be required to pay for monitoring that is ordinarily provided. If the microfilm project is performed in a research room set aside for copying and filming, we charge the project fees for these monitoring services and these fees will be based on direct salary costs (including benefits). When more than one project share the same space, monitoring costs will be divided equally among the projects. We specify the monitoring service fees in the written agreement required for project approval in §1254.102(h).

(h) The equipment normally should be in use each working day that it is in a NARA facility. The director of the NARA facility (as defined in §1252.2 of this chapter) decides when you must remove equipment because of lack of regular use. You must promptly remove equipment upon request of the facility director.

(i) We assume no responsibility for loss or damage to microfilm equipment or supplies you leave unattended.

(j) We inspect the microform output at scheduled intervals during the project to verify that the processed film meets the microfilm preparation and filming standards required by part
